MINING SCENARIO MEETING WITH AGENCIES AND WESTERN AGGREGATES -  
FWC-005-95 / pp-4/27/95

Action: None

I met with the Environmental Protection Agency, State and Western Aggregates representatives on March 15 as agreed upon in our telephone conversation of March 14. The Western Aggregates representative presented their mining criteria and plans for the site. He stated that at the present time they consider 40 feet of minable aggregates the minimum thickness required for them to be interested in mining an area. The only portions of the site that pass this criteria are the western portions. The only Operable Unit (OU) affected is OU 11. They stated they have the mineral rights to OU 11 and will be interested in mining there if it goes to NFA status.

Written concurrence from the Environmental Protection Agency was received stating that the mining scenario can be dropped from all OUs, except for OU 11. We have written concurrence from the state in comments dated February 28, 1995.

The mining scenario is being dropped from consideration in all OUs except OU 11 on the basis of the agency comments and our telephone conversation of April 3, 1995.

If you have any comments or questions, my extension is X8641.
